Project Management Tricks of the Trade® is designed for project managers, team members, project offices and senior managers looking to acquire a firm grasp of specific steps in the project management process, or of the entire process from beginning to end. In addition, because this course teaches students how to apply International PM standards in the real world, it can be taken as additional prep for people looking to earn one of a number of Internationally recognized project management certifications.

This course entails 21 hours of training over the course of three consecutive 7-hour days with one-hour lunch breaks.

Why Take This Project Management Course?
- To learn previously unpublished and untaught project management Tricks of the Trade® from over 4,000 other project managers.
- To translate the PMBOK® Guide into real-world project management technologies and applications.
- To save time by utilizing an accelerated learning technique that condenses two weeks of training into just three days.
- To increase your chances of passing the PMP® exam by refining your existing project management techniques, learning new methodologies and getting your mind around the PMI® approach to project management.

Learning Objectives
Upon completion of this course, attendees will be able to:
1. Define and describe common project management terminology.
2. Use a step-by-step process to manage projects faster while using fewer resources.
3. Avoid common pitfalls and mistakes in managing projects.
4. Apply the Tricks of the Trade® used by 4000 project managers around the world in various industries.
5. Apply the International Project Management Standards from the Project Management Institute (the PMBOK® Guide) to real-world situations.
6. Identify what knowledge and experience is needed to pass the Project
Management Institute's Project Management Professional (PMP)® Certification Exam.

Class Materials
Students receive a copy of the Project Management Tricks of the Trade® Workbook, a copy of RMC’s best-selling book, PM Crash Course™, and supplemental materials that provide the exercises and case studies that are used and referenced throughout the class.
